

Changelog V305

With the update to Release 305, your Touch E3 will be connected to a new, more powerful server. That requires, that you **update your mobile app** as well to the

clever touch Gen.2 

that you can find in your app-store.

If you want to access it via your web browser, please use

<https://e3.lvi.eu>

Enhancements

- New server platform (e3.lvi.eu)
- Secure (HTTPS) as standard communication for WebPage
- Hydronic products added (e.g. UFH)
