

Application	Type of radiator	Solution from Purmo	Description	Reasons for use	Design	Suitable for Low Temperature Systems
Modernisation	Panel radiators	Thermopanel V4, Compact, Ventil Compact, Flex	Classic panel radiators in a wide range of sizes	High performance, wide range of sizes, models and heat outputs available	Traditional style white panel radiators	✓
	Designer radiators	Narbonne, Delta	Fashionable, functional and flexible designer radiators available in horizontal and vertical models	Great looks and excellent heat outputs	Classical shape	✓
	Vertical radiators	Vertical, Faro V, Kos V, Narbonne V, Tinos V, Paros V	Various models: classic panel radiator and elegant designer radiators	Modern, space-saving design with high heat outputs	Space-saving, stylish and functional	✓
	Fan-assisted radiators	Ulow-E, Ulow E2	Built-in fans deliver up to 60% more heat than traditional radiators	Rapid heat response when required, ideal for low temperature heat sources	Traditional style with additional functionality	✓
	Fan convectors	iVector S2	Innovative low water content fan convector with discreet ceiling installation options	Fast and efficient heating, cooling function when combined with a reversible heat pump	Traditional style with various integration options	✓
Sophisticated living space design	Vertical radiators	Vertical, Faro V, Kos V, Narbonne V, Tinos V, Paros V	Various models: classic panel radiator and elegant designer radiators	Modern, space-saving design that frees up wall space for other purposes	Space-saving, stylish and functional	✓
	Designer radiators	Narbonne, Delta	Fashionable, functional and flexible designer radiators available in horizontal and vertical models	Great looks and excellent heat outputs	Classical shape	✓
	Trench convectors	Aquilo	Convectors for large, ceiling-to-floor windows available in low heights and in-floor models	High heat outputs in a compact solution	Compact design with low heights or submerged in the floor	✓
Bathroom	Traditional towel warmers	Flores, Java, Leros, Linosa, Nevis	Simple elegant and practical designs, including straight and curved models	"Easy integration, good looking and highly functional"	Classical ladder towel warmers	
	Designer bathroom radiators	Figuresse: Gate, Twist, Rasp, Impulse, Squasy, Squara, Slim	Designer radiators that effortlessly combine style and functionality, available in hydronic, electric or hybrid version	Create added value in the bathroom with a stylish heating element	Various original shapes and functional designs to cater to every taste	✓
	Electric towel rails	Skala, Alaid, Athena, Jarl, Muria, Nila, Senado	Electric towel warmers with electronic thermostat or 2-pole switch	Quick heating when a temperature boost is needed, pre-heated towels	Both classic and modern designs available	
Allergy sufferers	Tubular radiators	Delta	Fashionable, functional and flexible designer radiators available in horizontal and vertical models	Easy to clean due to rounded edges and wide distance between the tubes, minimises dust	Classical shape	✓
	Compact radiators without fins	Plan Flex, Thermopanel V4 Plan (Hygiene)	Classic compact panel radiators that are easy to clean	Easy to keep dustfree due to missing slats	Aesthetic and clean design with flat front surface	✓
Limited or restricted wall space	Vertical radiators	Vertical, Faro V, Kos V, Narbonne V, Tinos V, Paros V	Various models: classic panel radiator and elegant designer radiators	Modern, space-saving design that frees up wall space for other purposes	Space-saving, stylish and functional, possibility to attach a towel rail	✓
	Fan convectors	iVector S2	Innovative low water content fan convector with discreet ceiling installation options	Fast and efficient heating, ceiling installation frees up wall space	Unobtrusive design, can be ceiling mounted or discretely recessed in the ceiling	✓
Occasionally used rooms	Electric radiators	Yali, Yali Plus, Kaba2	A wide range of oil-filled electric radiators in various designs and sizes	Flexible installation with fast heat reaction	Traditional and modern designs available	
	Electric designer radiators	Epok, Langila, Sanbe, Tamari	Fashionable, functional and flexible designer radiators available in horizontal and vertical models	Flexible installation with fast heat reaction	Classical, modern and retro designs available	
	Electric towel rails	Skala, Alaid, Athena, Jarl, Muria, Nila, Senado	Electric towel warmers with electronic thermostat or 2-pole switch	Quick heating when a temperature boost is needed, pre-heated towels	Both classic and modern designs available	
	Fan convectors	iVector S2	Innovative low water content fan convector with flexible installation options	Rapid heat up times with low water content, can offer both heating and cooling	Unobtrusive design, can be surface mounted or discretely recessed	✓
Cooling in summer	Fan convectors	iVector S2	Innovative low water content fan convector with flexible installation options	Cooling in summer when combined with a reversible heat pump or cooling source	Unobtrusive design, can be surface mounted or discretely recessed	✓
	Fan-assisted radiators	Ulow E2	Fans provide gentle air movement to create a pleasant 'summer breeze' effect	Summer breeze function for warm days and rapid heat response in winter	Traditional style with additional functionality	✓
No gas /hot water supply	Electric radiators	Yali, Yali Plus, Kaba2	A wide range of oil-filled electric radiators in various designs and sizes	Flexible installation and easy operation without central heating or pipework	Traditional and modern designs available	
	Electric designer radiators	Epok, Langila, Sanbe, Tamari	Fashionable, functional and flexible designer radiators available in horizontal and vertical models	Flexible installation and easy operation without central heating or pipework	Classical, modern and retro designs available	
	Electric towel rails	Skala, Alaid, Athena, Jarl, Muria, Nila, Senado	Electric towel warmers with electronic thermostat or 2-pole switch	Quick heating, perfect for small areas like bathrooms or cloakrooms where there is no existing pipework	Both classic and modern designs available	
Healthcare/ educational facility	Hygiene radiators	Hygiene, Thermopanel V4 Hygiene	Traditional panel radiators without convection fins, top grates and side panels	Very easy to clean	Classical shape	✓
	Tubular radiators	Delta	Fashionable, functional and flexible designer radiators available in horizontal and vertical models	Easy to clean due to rounded edges and wide distance between the tubes, minimises dust	Classical shape	✓
	Fan convectors	iVector S2	Innovative low water content fan convector with flexible installation options	Fast and efficient heating, can be safely installed in or on the ceiling	Modern and discreet	✓
